

## Peter Jamieson

*I offer a wide range of business, entrepreneurial, organizational development and leadership skills.*

*My early days- seventeen years with an international petrochemical company – various progressive sales, marketing, human resources and business roles including member of the Canadian Leadership team.*

*The next twenty plus years were concentrated on expanding, developing, and team building with a Canadian entrepreneurial logistics company "the Wheels Group," which earned Platinum status as one of Canada's Best Managed Companies. My various roles included VP Sales, President, Partner and Chief Operating Officer with organizational, operational, administrative and financial responsibilities. Wheels Group grew to be a leading Canadian/NA logistics organization through customer growth, service expansion and strategic acquisitions. We transformed from a private to publicly traded company in 2012.*

*My strengths are collaborating with people, teams, customers and suppliers at all levels, gaining input for goals and establishing plans to deliver desired objectives and results. I believe in open respectful communication with all parties. Now retired I have the time to offer my community support to NOTL's future.*
