

## **Brenda Tipper**

My husband and I have lived in Toronto and Hockley Valley and are now pleased to call Niagara-on-the-Lake home, having moved here in June 2025 (while still keeping a couple of toes in Toronto for the time being). We had long been drawn to this area for its green space, walkability, and the vibrancy of the town and surrounding region. It is this balance that I hope to support as a member of the Community Services, Quality of Life & Tourism Management Committee.

I hold a Master of Health Science from the University of Toronto, and my professional background spans health information and policy, analytics, finance, and project management. I have worked with the Canadian Institute for Health Information, the Ontario Ministry of Health and Long-Term Care, and University Health Network, with extensive experience supporting advisory, consultative, and policy groups to understand issues and help develop practical solutions.

I am excited to meet new people, become engaged in the community, and contribute in whatever way I can to a healthy, welcoming environment for residents and visitors alike.
